

AMENDMENTS TO THE ABSTRACT

An apparatus for aligning a dispenser includes: loading substrates of a liquid crystal display panel on a table that can move horizontally in forward/backward and left/right directions ~~for receiving a substrate of at least one liquid crystal display panel;~~ joining first and second dummy aligning plates on the table with a predetermined ~~certain~~ space therebetween; a ~~syringe~~ for supplying a sealant onto the first and second dummy aligning plates to form first and second alignment patterns; a ~~first image camera~~ for detecting an image of the first alignment pattern; a ~~second image camera~~ for detecting an image of the second alignment pattern; and an ~~alignment controller~~ for aligning the image of the first image camera with a first reference position and the image of the second image camera with a second reference position.
